

Creating and managing public websites was never simpler

"InternetLite leverages the latest Microsoft Office SharePoint Server (MOSS) platform and enables users to rapidly deploy websites and other solutions. Customers are able to quickly deploy a website with full content management capabilities based on a platform on which they can build other business solutions including e-Forms, Search and Collaboration"

Domenic Chiera

Business Productivity Solution Specialist

Microsoft Australia

- "Out of the box" website template for Government Agencies
- Low cost, rich functionality and quick to deploy
- Fully compliant with W3C Web Content Accessibility Guidelines (WCAG) 2.0
- Built on the Microsoft Office SharePoint Server 2007 platform

InternetLite is an easily deployable "out of the box" website template for Government agencies which can be implemented as:

- * A fully functional website with prebuilt content and functionality and advanced content management capabilities enabling end users to create, edit and publish their own web pages
- * An Internet Starter Kit, providing a standards based application framework, for web developers to create and edit sophisticated public websites

InternetLite is fully compliant with the WA government's Web Governance Framework (WGF) and complies with the "AA" standards of the W3C Web Content Accessibility Guidelines (WCAG) 2.0 ensuring accessibility and usability of Government online information and services

InternetLite is built on Microsoft Office Sharepoint Server 2007 (MOSS 2007) providing advanced web and content management facilities and integration with other Microsoft office and desktop application which can be extended to include forms (workflows), search and collaboration.

Government is a major user of the internet increasingly delivering information and services online.

InternetLite significantly reduces the **time** and **cost** involved in the development of public websites by:

- * Delivering a simple and cost effective solution for the creation of brochure and campaign style sites
- * Enabling end users to create, edit and publish their own content
- * Providing an application framework to ensure greater consistency and reduced duplication
- * Providing a simple "One click installation" process
